

Arcadia Suite

Arcadia Suite is a collection of **WEB applications** for the management of Service Stations and Convenience Stores, whose main characteristic is the accessibility by means of a browser from any computer, WAP or PDA telephone with **real time processes**.

What makes **Arcadia Suite** really different? Its real time integration with the Point of Sale Systems (POS) of **Avalon** and of other manufacturers certified by **PCATS**; this means that the sales and other transactions are integrated in real time.

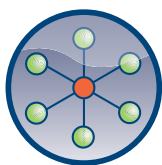

Arcadia Suite potentiates and specializes the collection operations, the sales and the promotions, with a great increase in strength and failure-tolerant. It provides a very significant improvement in costs, and in the productivity of the personnel and the business.

To Highlight

With **Arcadia Suite** you have the **availability of your operations and the knowledge of your business in real time**.

It perfectly adapts to any type of company, offering a customized solution which is 100% scalable as a solution for your company, and can be **completely configured** by the user, providing a significant integration and simplification of the Front and Back Office processes.

With **Arcadia Suite** you minimize the risks associated to the human factor, you save costs and you make sure that the information integrated to the processes is reliable.
